Employment history

11.2018 - present | **FirstData / Fiserv**

Software architect (Nürnberg, Deutschland)
I was relocated to the Germany branch, where I came back to my development position in the Internet Payment Gateway. Really focused on boarding services and the cryptographic modules of the app that communicate with Thales and Futurex HSMs.

Also, collaborated with the team in the development from scratch of the new boarding app in a reactive using Spring Reactor framework. On-call support outside working hours.

I also collaborated on the development, using Quarkus, of the company's alternative payment method framework, which processes payments from PayPal, Ideal, Klarna, Bancontact, and ADCB Touchpoints.

DevOps (Buenos Aires, Argentina)
After having some experience as a software developer in the company I started to help in the troubleshooting of incidents, and working in the deployment of the application contributing to the installation of the k8s on/premise cluster, the monitoring system using Grafana, Kibana. On-call support outside working hours.

Software developer (Buenos Aires, Argentina)
Working in the development of new features in Internet Payments Gateway of the company, working with Java and Spring boot. SME of the gateway for LATAM. On-call support outside working hours.

06.2015 - 11.2018| Prisma Medios de Pago

Software developer (Buenos Aires, Argentina)
Software developer at the major payment processor company in Argentina. As a Java developer I worked in the migration of an application made using Spring Boot microservices also I made many processes using Spring Batch. I was the SME of card production. On-call support outside working hours.

02.2007 - 06.2015| Caipe Automatización (Bellplast SRL)
